Autumn Curves and Crosses Pencil Control

Answers and adult support.

How to use the page

Begin at each filled dot and move slowly along the dashed path. A broad natural pencil grip and relaxed arm are more useful than perfect accuracy. Stop if the hand becomes tired.

Movement sequence

Leaf curves practise broad changes in direction. Acorn loops continue around a rounded shape. Crossing twigs ask the pencil to meet and pass through one clear crossing point.

Independent row

Invite the learner to invent one similar pattern in the final box. This is open fine-motor practice, not a scored handwriting assessment.
