Bus Timetable: Read and Choose

Answers, explanations and adult support.

Five answers

1 09:38. 2 Library. 3 25 minutes. 4 Bus B. 5 Bus B.

Read a journey down its column

The three letters name different journeys on the same imaginary route. Each time is the time that bus leaves that stop. The row gives a place; the column keeps the same journey. All times are in the morning, using a 24-hour clock.

Explain the choices

For question 3, count from 09:10 to 09:30 (20 minutes), then to 09:35 (5 more). For question 4, 09:10 has passed at 09:24; bus B leaves at 09:30. For question 5, bus B reaches the Museum at 09:55; bus C reaches it at 10:15, too late.

Use the stated model

These are fictional times for reading practice, not travel advice. Assume each listed bus runs exactly on time and the traveller is ready at the stop. By 10:00 includes 10:00. Earlier journeys can also arrive in time; the question asks for the latest one.
