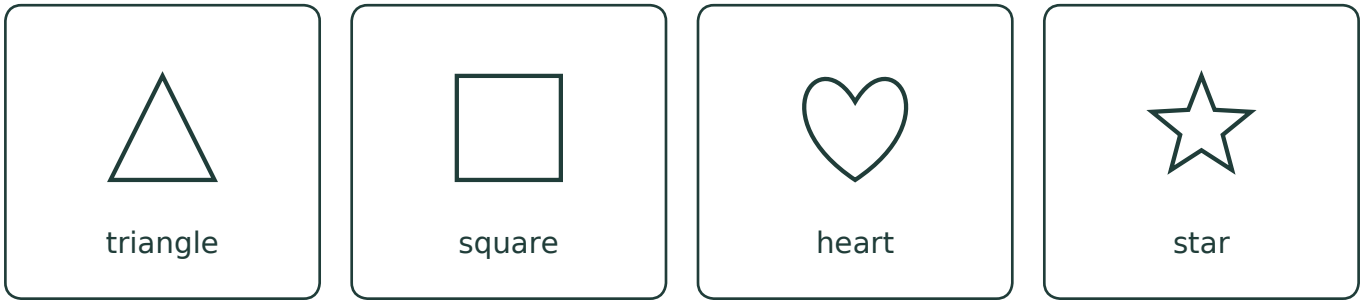
Castle Keys: Crack the Shape Code

Answer guide: all four clues must work together.

The only code, from left to right



1. Circle is excluded. Use triangle, square, heart and star once each.

2. Heart and star form a block, in that order. Square must be before this block.

3. If triangle were last, the other shapes would have to be square, heart, star. Triangle would then be next to star, which is forbidden.

4. So triangle is first. Square must be second, followed by heart and star. Check all four clues again.
