Design a Cosy Reading Nook

Answers and adult support.

A useful plan

There is no single drawing answer. Check that the plan identifies a reader and labels a seat, useful light, book storage and a clear route.

Test the idea

Can the reader reach a book, sit comfortably and leave safely? The learner may point, role-play with a small paper model or explain the route aloud.

Improve one detail

Ask which part would be hardest to use and what could change. Keep fire, electrical and furniture decisions with an adult; this activity plans an imaginary or paper model rather than altering a real room.
