Design a Library Book Return

Answers and adult support.

A useful plan

There is no single drawing answer. Check that the learner chose a location and labelled a clear book opening, protection for books, a readable sign and an adult access point.

Test the idea

Can a paper book enter gently, stay protected and be removed by an adult? Use a folded scrap of paper as the pretend book; do not put books into a real container.

Improve one detail

Ask what might happen in rain, during a busy return time or when the box is full. Building, fixing and lifting a real box remain adult jobs.
