Elapsed Time: Count Forward in Minutes

Use short jumps to find the time that passes.

Find how many minutes pass. Each finish is later in the same part of the day. Count forward in five-minute steps.

Example: 10:50 to 11:15

10:50 to 11:00 = 10 minutes

11:00 to 11:15 = 15 minutes Total: 25 minutes

1. 9:10 to 9:25 _____ minutes

My counting steps: _____

2. 10:35 to 11:00 _____ minutes

My counting steps: _____

3. 11:45 to 12:10 _____ minutes

My counting steps: _____

4. 1:20 to 1:50 _____ minutes

My counting steps: _____

5. 2:50 to 3:05 _____ minutes

My counting steps: _____

6. 3:15 to 4:00 _____ minutes

My counting steps: _____

Check: count minutes rather than subtracting clock digits.
