Final ng: Read, Sort and Complete

Answers and adult support.

The two groups

Ending in ng: ring, sing, wing, long. Other endings: pan, sun, run, log. Each printed word belongs in one group.

Complete from the clues

1. ring. 2. wing. 3. sing. Each blank is completed with ng. These answers match the finger band, flying bird and voice clues.

Say and notice

Read ring slowly together. In these examples, ng is two letters representing one final sound. Compare ring and run without adding an extra vowel after the ending. Read the whole word after completing it.

Support without guessing

The learner may point to each word while an adult reads it. Discuss a clue before writing. This is practice with this selected ending, not a claim that the letters ng behave identically in every English word or accent.
