# Leaf Rubbing: Read and Order

Answers and adult support.

## Step numbers, from top to bottom

Write 4, 1, 5, 2 and 3 beside the five mixed-up instructions. The complete sequence is: position the leaf, lay paper over it, hold the paper, rub with the crayon, then lift the paper.

## Two literal answers

1. The bumpy side faces up. 2. Use the side of the crayon. Both answers are stated in the passage; equivalent wording is welcome.

## Read with support

An adult may read the passage and mixed-up steps aloud. Let the child point and explain an order before writing. This is instruction reading, not a test of fluent independent spelling.

## Trying the activity is optional

The worksheet can be completed from the text alone. If making a rubbing, an adult supplies a safe fallen leaf, paper and crayon and helps hold them steady. Follow the order and notice how written instructions support the practical task.
