Mittens Loops and Lines Pencil Control

Answers and adult support.

How to use the page

Begin at each filled dot and move slowly along the dashed path. A relaxed hand and comfortable movement matter more than perfect accuracy. Stop when the hand becomes tired.

Movement sequence

Mitten loops repeat a rounded movement. Scarf corners practise clear changes of direction. Snowy curves alternate broad upward and downward movement.

Independent row

Invite one short pattern in the final box. This is open pencil-control practice, not a scored handwriting assessment.
