Pushes and Pulls: Read the Action

Answers, practical support and discussion.

Six answers

1 push; 2 pull; 3 push; 4 pull; 5 push; 6 pull. The instruction specifies the action on the named object.

Arrows

Book arrow: right, away from the person on the left. Toy cart arrow: left, towards the person on the left. The page asks for direction of the stated action, not a complete force diagram.

Own example

Accept a clear push or pull with the object named. A door can be pushed or pulled, so an answer must specify the action rather than merely name a door.

Adult support

Read actions aloud where needed and demonstrate gently with familiar objects. Do not use heavy furniture, tightly trapped fingers or forceful pulling.
