Read a Garden Pictogram

Use this garden survey. Each symbol stands for exactly one flower.

KEY = **1 flower**

Daisies	7
Tulips	5
Sunflowers	3
Poppies	8

LOOK TOGETHER

There are 7 daisies: count one symbol for each flower.

1. How many tulips were counted?

5 Count one for each printed symbol.

2. How many sunflowers were counted?

3 Count one for each printed symbol.

3. How many poppies were counted?

8 Count one for each printed symbol.

4. How many flowers were counted altogether?

23 7 + 5 + 3 + 8 = 23

Point to each symbol once. Count every row when finding the total.

Use this garden survey. Each symbol stands for exactly one flower.

KEY = **1 flower**

Daisies	7
Tulips	5
Sunflowers	3
Poppies	8

LOOK TOGETHER

Sunflowers have the fewest: their row has just 3 symbols.

5. Which flower was counted the most?

Poppies — 8 is the greatest row count.

6. How many more poppies than tulips were counted?

3 — 8 - 5 = 3

7. How many daisies and sunflowers were counted altogether?

10 — 7 + 3 = 10

8. How many more sunflowers would make 5, the same as tulips?

2 — 3 + 2 = 5

Use the row counts to compare, combine and make equal amounts.
