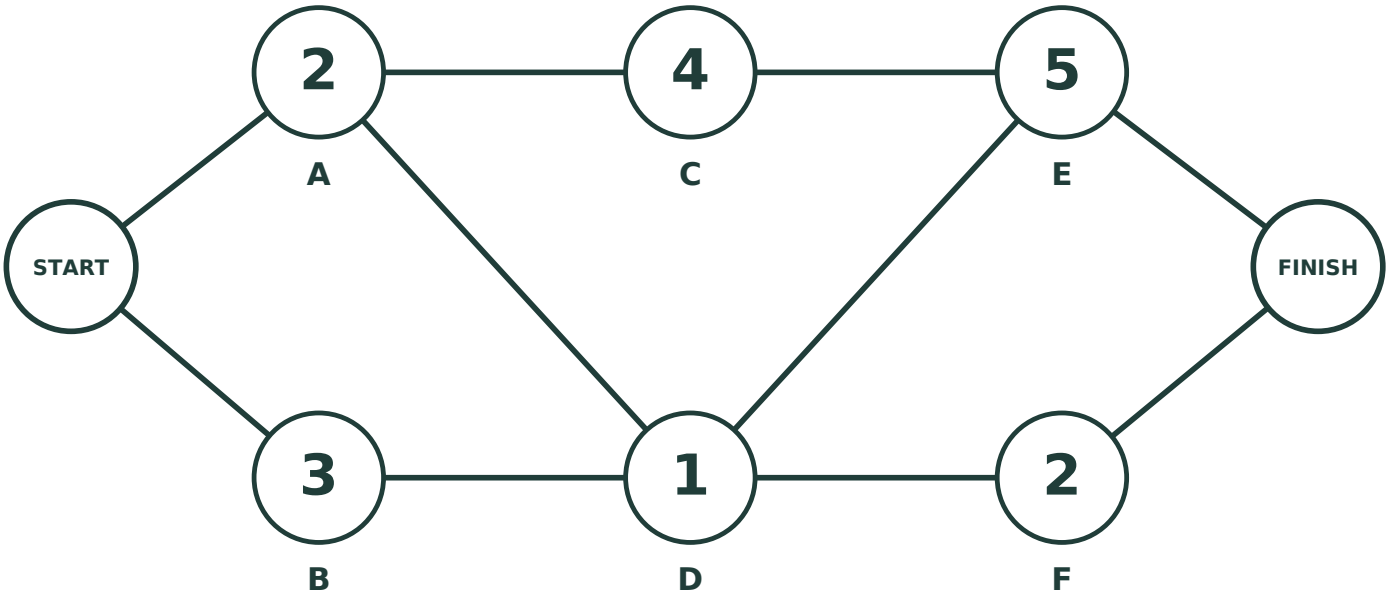
River Crossing: The Eight-Point Route

Find the one route that follows all three rules.

1. Start at START and finish at FINISH.
2. Move only along the drawn bridges. Do not visit a stone twice.
3. Visit exactly three numbered stones. Their numbers must total 8.

The lines are bridges. The numbers are on stones.



My three stone letters: _____ , _____ , _____

My number sentence: _____ + _____ + _____ = 8

Point to each stone as you check your route. Does it use three stones? Do their numbers add to eight?

You may move in either direction along a bridge. Do not revisit a stone.
