Round to the Nearest Ten with Number Lines

Mark each number on its line, then choose the nearest ten.

Round to the nearer ten. If a number is exactly halfway between two tens, round up to the next ten.

Example: 34 is nearer 30 than 40.

1. 12

Nearest ten: _____

2. 24

Nearest ten: _____

3. 35

Nearest ten: _____

4. 48

Nearest ten: _____

5. 62

Nearest ten: _____

6. 76

Nearest ten: _____

Explain to a partner: what happens when a number ends in 5?
