Where Is the Ball? Position Pictures

Answers and adult support.

Read aloud; the learner circles a picture

1. inside: the middle picture. 2. above: the right picture. 3. below: the left picture. 4. between: the right picture. Each printed position has exactly one correct picture.

What the pictures mean

The outlined rectangles are frames viewed straight on. Inside means within a frame. Above and below compare vertical positions on the page. Between means in the gap separating the two frames; touching a frame is not required.

The drawing is open ended

Accept a ball beside the final frame on either side. Ask the child to point and describe the relationship. There is no fixed shape or artistic answer.

Adapt to the child

An adult reads each direction and can point to the relevant frame. Use real objects first if useful, and accept pointing instead of circling. This is a spoken spatial-language activity, not an independent reading test.
