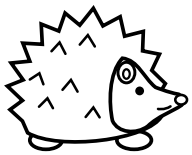
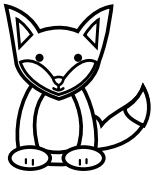
Woodland Picnic: Who Sits Where?

Answer guide: the animals match all four clues.

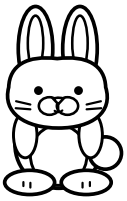
The one solution, from left to right:



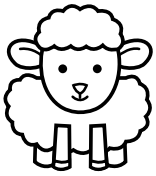
hedgehog



fox



bunny



lamb

Look at the numbered places from left to right.

PLACE 1	PLACE 2	PLACE 3	PLACE 4
			hedgehog	**fox**	**bunny**	**lamb**

Check every clue against the answer:

1. The hedgehog sits at place 1.
2. The fox sits next to the bunny.
3. The lamb sits somewhere to the right of the fox.
4. The bunny does not sit at place 2.

Why this is the only answer

The hedgehog uses place 1. If the fox used place 3, the bunny would need place 2 or 4. Place 2 is ruled out; place 4 would leave no space for the lamb to the right. So the fox uses place 2, the bunny place 3 and the lamb place 4.

“Next to” means immediately beside. “To the right” can be any later place.
